

Reduced Bore, Combination Air Valve Series PATENTED

Description

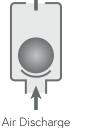

A.R.I. D-43 is a reduced bore, single-body, Combination Air Valve Series. Installed on liquid transmission systems, the Air Valve is designed to improve hydraulic operation by protecting the pipeline, increasing pipeline efficiency and reducing energy requirements.

Installation

- Pump stations: after the pump and after the check valve
- Downstream (after) and upstream (before) of shut-off valves
- After deep-well pumps
- On long constant-sloped pipeline segments
- At peaks along the pipeline and at peaks relative to hydraulic gradient
- At end lines
- Before water meters
- On strainers and filters

Operation

Automatic Air Release

Features and Benefits

Single-body design	Easy to install and maintain, reduces downtime	
	High-capacity air discharge, no premature closure	
Aerodynamic design	Reduces water hammer impact	
	Saves energy and increases system efficiency	
Screen protected outlet	Prevents intrusion of insects and debris	
Construction materials	Non-corrosive and durable	
Automatic air release valve rolling seal	Leak-free sealing over a wide range of pressure differentials	
Automatic air release valve orifice	High flow air release, lessens obstruction by debris	
ATEX certified air valves	ATEX certified air valves are optional by customer request. Certification is conditional upon the customer connecting the designated part on the product to a dedicated ground connection point	
NSF/ANSI/CAN 61 certified & listed	For drinking water system component	
NSF/ANSI 372 certified & listed	Conforms with lead content requirements for "lead-free" plumbing	

Technical Specifications

Size range	2" -8"		
Working pressure range	2" 0.1-10 bar (PN10) 3"-8" 0.1-16 bar (PN16))		
Testing pressure	1.5 times maximum working pressure		
Temperature	Maximum working temperature: 60° C Maximum intermittent temperature: 90° C		
Metal Valve Coating	Fusion bonded epoxy coating in compliance with standard DIN 30677-2		
Upon ordering, please specify: model, size, working pressure, thread/ flange standard and type of liquid			

Valve Selection Options

Valve connection	Threaded male or female BSPT/NPT (2", 3"), Flanged ends to meet various requested standard (3"-8")
Standard materials Reinforced nylon, cast ductile iron body	
Optional Add-on Components	One-way, Out-only attachment, allows for air discharge only, prevents air intake Adjustable Non-Slam disc, can also be optionally retrofitted on existing D-43 air valves.
Additional Product Configurations	SB Underground Air Valve System

The valve installed under the air valve must be fully open to prevent damage or malfunction and ensure performance within the specifications of the air valve.

For complete installation instructions, please refer to the IOM document.

Non-Slam Add-on Component Data Table for Variable Orifices

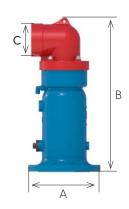

Size	Number of orifices	Discharge orifice (mm)	Total NS area (mm²)	NS orifice (mm)	Switching point (bar)	Flow at 0.4 bar (m³/h)
Nylon Models						
2" (50mm)	1 orifice	34	12.6	4		24
	1 orifice	50	15.9	4.5	Spring loaded	23
3" (50mm)	2 orifices	50	31.8	6.4	normally closed 32	32
	3 orifices	50	47.7	7.8		40
Metal Models						
3" (80mm)	1 orifice	50	78.5	10	0.001	65
4" (100mm)	1 orifice	80	184	15	0.004	180
6" (150mm)	1 orifice	100	397	22.5	0.005	235
8" (200mm)	1 orifice	150	884	34	0.03	725

Parts List and Specification | Nylon 2"

No.	Part	Material
1	Discharge Elbow Assembly	
1a.	Discharge Elbow	Polypropylene
1b.	O-rings	NBR
1c.	Non-slam Component (optional)	Reinforced Nylon / Polypropylene + Acetal + Stainless Steel
2	Body	Reinforced Polypropylene
3	Air Release / Air & Vacuum Assembly	
3a.	Air & Vacuum Seal	EPDM
3b.	Air Release Cover	Acetal
3c.	Rolling Seal	EPDM
3d.	Float	Polypropylene
3e.	Float Lock	Polypropylene
